Videocom Security Systems, Inc.
6445 Booth Street
Rego Park, NY 11374

To whom it may concern:

This letter is to serve Videocom Systems as a reference for the Intercom System Installation and Service provided at – The Chesterfield, 185 West 80th St. New York City.

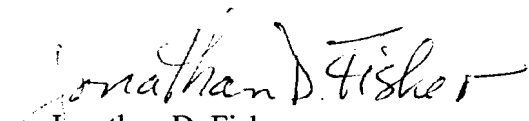

In February of 2007, Videocom has installed a 90 units 2 way communication Digital Intercom System in our Co-op building and ever since the system has been in excellent operational condition.

Just once, when a visitor spilled by mistake some juice over the Concierge Desk and Intercom, the unit started to malfunction but Videocom came to service the same day and cleaned the doorman intercom unit, so that the system was put back in normal operational condition right away.

All tenants have been extremely happy with the system because it sounds loud and clear and it has a modern and contemporary appearance in the apartments; it elevated the look of our vestibule area that used to have an old, way too large panel - direct call - type of intercom system.

If anybody will need further references regarding Videocom Installations and Service, I will be more than happy to provide you with such references at 212 877 6798.

Sincerely,

Jonathan D. Fisher
Resident Manager at the Chesterfield
